

MATASE
INDUSTRIAL SOLUTIONS

Unleashed Potential. Empowered Capability

Business Profile

About Us

Matase Industrial Solutions is an established electrical equipment manufacturer, which specializes in standby generator sets, electrical installation, battery power storage, and uninterrupted power systems with ISO 9001, 45001 and 14001 certifications.

We offer generator rentals, maintenance, repairs, installations and diesel refills across Southern Africa.

We are an approved OEM for Gamatronics and KSTAR UPS Solutions, for the SADC region.

We are amongst the biggest participants in the data center space in the Sub-Saharan African region, with a proven track record over the years.

Our biggest clients are in the banking, hospitality, office building, water utilities, aviation, TV and radio signals, rail, food retail, health facilities and others.

Our executive management team is diversified, with over 100 years collective diesel generator experience in senior team.

Unleashed Potential. Empowered Capability

Our Services

UPS

5kVA to 1250kVA UPS systems.
We offer Modular UPSes,
Centric modular, Online double
conversion, Power+ SA UPS

Diesel Generators

Closed & Open canopy sets
ranging from 20KVA up to
2500kVA

Generator Rentals

Delivery and rental of
generators nationally.

Service & Maintenance

Minor and Major servicing of
generators and UPSes
including refurbishments.

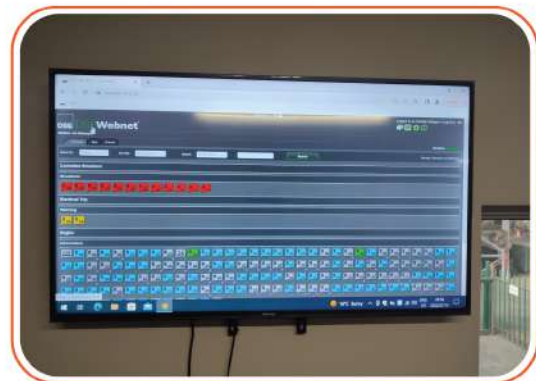

Diesel Refills

Nationwide diesel refills of
generators.

Remote Monitoring

24hr remote monitoring
facility for all installed
generators.

Our Services

Solar & BESS Solutions

We have in-house Electrical Engineers and Technicians with vast experience in providing solar & BESS solutions for businesses.

This level of expertise, when bundled with over 30 years of cumulative generator experience allows us to be able to provide hybrid power solutions.

Matase's BESS (Battery Energy Storage System) solutions have the following applications:

- 1) Power Generation.
- 2) Transmission & Distribution (Utility)
- 3) Industrial Commercial & Industrial (C&I)

1) Voltage regulation; Power stabilisation; Frequency regulation.

2) Load balancing; Reduction in peak demand; Elimination of network overloads.

3) Energy backup; Energy management; Distributed storage; Reduction in consumption.

Our Facilities

SHEQ Standards

Matase Industrial Solutions is certified in the following SHEQ standards:

ISO 9001 ensures that our clients get consistent, good-quality products and services at all times.

ISO 14001 ensures that we follow the guidelines set in place for use that relate to environmental systems. These include proper waste management that doesn't affect the environment.

ISO 45001 allows us to establish, implement and maintain an OH&S (Occupational Health & Safety) management system to improve occupational health and safety, eliminate hazards and minimize OH&S risks (including system deficiencies), and we are able to take advantage of OH&S opportunities, and address OH&S management system nonconformities associated with our activities.

Our employees and the environment are at the core of our operations. In pursuance here of, Matase Industrial Solutions is committed to the safety and health of all its employees and to ensure full compliance with all statutory requirements. The company is also committed to conducting its business in a way that ensures the protection of our environment.

Project Highlights

SABC - 1250kVA

1000kVA Open Set

Mowana Properties - 500kVA

Transnet

Ndlambe Local Municipality - 20, 40 & 130kVA

Elroi Trading

Multiple Sets on Board for Delivery

MATASE
INDUSTRIAL SOLUTIONS

Unleashed Potential. Empowered Capability

Our facilities have the capability to produce high quality gensets. With a wide range of sizes to choose from

Some of the generators in the workshop during the assembly phase before testing and delivery to client.

Transnet project with multiple generators custom built for the purpose of being utilised on-the-go.
